

Muhammed Sanjid

Frontend Engineer · React · Next.js · TypeScript

Kozhikode, Kerala, India · contact@sanjid.in · sanjid.in · github.com/m-sanjid · linkedin.com/in/muhammedsanjid1

SUMMARY

Frontend engineer who takes product UI from layout to production components in React, Next.js and TypeScript. Built Woxly, a multi-tenant commerce platform with storefronts, a vendor dashboard and multi-gateway payments.

SKILLS

Frontend: React, Next.js (App Router), TypeScript, JavaScript, Tailwind CSS, shadcn/ui, Motion, MDX, React Native

UI engineering: Design systems, reusable component libraries, accessibility (WCAG AA, keyboard nav, reduced motion), responsive design, SEO and structured data

Backend & data: Node.js, Express, PostgreSQL, MongoDB, Supabase, Zod, Razorpay

Tools: Git, Figma, Vercel, Docker, AWS, AI-assisted development

EXPERIENCE

Lead Software Engineer — Woxly

Remote · 2025 – Present

- Lead engineering for Woxly, a multi-tenant commerce platform for small sellers, owning frontend architecture, UI systems and shipping from interface decisions through production.
- Built three Next.js surfaces on one commerce core: a marketing site that converts into onboarding, a vendor dashboard (KPIs, orders, filters, status workflows, exports) and tenant storefronts.
- Implemented tenant-aware routing for merchant isolation and role-separated vendor and customer flows.
- Integrated multiple payment gateways, including Razorpay, with a post-payment order lifecycle that feeds fulfillment.
- **Stack:** Next.js, React, TypeScript, Tailwind CSS, Node.js, PostgreSQL

Design Engineer — Ocean Lab

Remote · Jan 2026 – Mar 2026

- Designed and engineered product UI for Ocean Lab's enterprise software practice, from layout through production React components.
- Translated complex, compliance-aware workflows into clear, accessible interfaces.
- Owned both design and build, keeping handoffs tight and interface quality at the engineering bar.
- **Stack:** React, Next.js, TypeScript, Tailwind CSS, Motion, Figma

Frontend & Design Engineer — Freelance

Remote, part-time · Nov 2024 – Present

- Delivered marketing sites and web apps for Calystron Technologies, Ideal Alchemy, Gritink and clients under NDA.
- For Calystron Technologies, built a lead pipeline with Zod validation, honeypot and IP rate limiting, routing each lead to Supabase, a Notion CRM and Resend email, using Promise.allSettled so no lead is lost on a partial failure.
- Added SEO foundations: sitemap, canonical URLs, dynamic Open Graph images and schema.org structured data.

ELV Estimation Engineer — NAFFCO

Dubai, UAE · Dec 2023 – Sep 2024

- Automated estimation workflows with Excel VBA, reducing manual effort and errors.
- Supported large project bids alongside cross-functional engineering teams and standardized proposal templates.

PROJECTS

Woxly — woxly.store

- Commerce platform that moves small sellers off WhatsApp, Instagram DMs and spreadsheets onto one system for storefront, orders and payments.
- Live surfaces: marketing site, vendor dashboard (app.woxly.store) and demo storefront (demo.woxly.store).
- **Stack:** Next.js, TypeScript, Tailwind CSS, Razorpay

Velnor UI — ui.sanjid.in

- Open-source, motion-first React component library with 10+ production-ready components and 5+ starter templates.
- Built reusable animation hooks and motion primitives, responsive layout components, command-palette search, installation docs and a CLI guide.
- **Stack:** React, Next.js, TypeScript, Motion

EDUCATION

Bachelor of Technology (BTech), Electrical and Electronics Engineering

2019 – 2023

APJ Abdul Kalam Technological University
